(11) Combining WHERE, AND and ORDER BY

Write a SQL query to retrieve the first and last names of employees who work in the finance or marketing department, earn more than $2000 and order the results by salary in descending order.

```
select
    first_name,
    last_name,
    salary
from workspace.default.employees
where department='finance' or department='marketing'
  and salary > 52000
  order by salary desc;
```

first_name	last_name	salary
Mike	Johnson	60000
Robert	Wilson	54000
Daniel	Clark	53000

(12) Combining select distinct, where and IN

- Write a SQL query to find all the unique cities where employees work, excluding those in the IT and HR departments.
